

Physicians' Primary Care of Southwest Florida earns national recognition

Special to Fort Myers News-Press
USA TODAY NETWORK – FLORIDA

Physicians' Primary Care of Southwest Florida is the recipient of three national awards from the American Heart Association and the American Medical Association in recognition of its commitment to improving the health of its patients in cholesterol management, controlling blood pressure and management of Type II Diabetes.

Gold Awards were presented in the following areas:

- **Blood pressure control** – The Gold Award recognizes practices that have 70 percent or more of their adult patient population with high blood pressure controlled. Physicians' Primary Care reports that 85 percent of its adult patients have their blood pressure under control. The Gold Award recognition is part of the 2020 Target: BP™ Recognition Program, which is a national collaboration between the AHA

and the AMA aimed at reducing the number of Americans who suffer from heart attacks and strokes each year.

- **Cholesterol control** – The Gold Award recognizes practices that have 70 percent or more of their adult at-risk patient population appropriately managed with statin therapy. Physicians'

Primary Care reports that 74 percent of their at-risk adult population has their cholesterol managed with statin therapy.

- **Type II Diabetes management** – The Gold Award recognizes practices that have 75 percent or more of their patient population maintain control of their diabetes with diet, exercise and medication management. Physicians' Primary Care met this standard.

“We are very proud of the physicians, nurses and staff who have made the well-being of our patients their highest priority, resulting in so many of our patients reducing their high blood pressure, reducing cholesterol levels and managing their diabetes,” said Dr. Mary Yankaskas, managing physician of Physicians' Primary Care of Southwest Florida. “We are very proud to be part of these programs presented by the American Heart Association in partnership with the American Medical Association.”
